----------	--

Summary	<i>Motivated and goal-oriented 2nd-year Electronics and Communication Engineering student with strong critical thinking and leadership abilities. Known for taking initiative in team projects and solving problems efficiently. Eager to apply technical knowledge and soft skills in real-time through internships and hands-on learning opportunities.</i>
---------	--

Experience	Digisailor February - March 2025 Thoothukudi Web Development - Intern https://www.digisailor.com/ Completed a one-month internship in Web Development at Digisailor, gaining hands-on experience in front-end and back-end development. Contributed to designing responsive user interfaces and understanding the workflow of web-based applications. Improved skills in HTML, CSS, JavaScript, NODE JS and GIT HUB in a real-world development environment.
------------	--

Education	Dr. Sivanthi Aditanar College of Engineering 2023 to present Bachelor of Engineering Electronics and Communication Engineering Currently pursuing a B.E. in Electronics and Communication Engineering at Dr. Sivanthi Aditanar College of Engineering, with a focus on developing skills in IoT and embedded systems. Actively enhancing practical knowledge through coursework, projects, and hands-on learning. St. Mary's Girls' Higher secondary School 2016 to 2023 Higher Secondary Maths- Biology Completed schooling with active involvement in sports, where I showcased my abilities, teamwork, and leadership skills. Also developed a strong interest in science and technology through practical learning and curiosity.
-----------	---

Skill Set	Web Development Basic knowledge of web development with hands-on experience in HTML, CSS, and JavaScript. Able to create simple, responsive web pages and understand core web design principles. HTML, CSS, JavaScript Tools & Platforms I have practiced using Visual Studio Code for coding, Node.js for backend tasks, and GitHub for version control and project collaboration. Visual studio code, Git/ Github, Node JS Programming Languages Have basic knowledge in C and Python, with understanding of data structures. Gained hands-on practice through small projects and coding exercises C Programming, Data Structure, Python Soft skills Self-motivated and curious learner with strong teamwork and problem-solving abilities. Skilled in decision-making, multitasking, and brainstorming, with a patient and positive approach to learning and growth.
-----------	---

Area of Interest	- Embedded Electronics - Front-end development - IoT
------------------	--

Projects	Smart Waste Management System using IoT for Dustbin Overflow Detection and Notification Overflowing dustbins in cities cause dirty streets due to lack of real-time monitoring, leading to delayed waste collection and poor hygiene. <i>This project uses sensors to monitor the fill level of dustbins in real time. When a bin is about to overflow, the system sends alerts to waste management authorities for timely collection. This prevents waste spillage, keeps streets clean, and improves hygiene and efficiency in urban waste management.</i> Portfolio Website https://mercy-portfolio.web.app/ Created a responsive and interactive portfolio website to highlight my projects, skills, and experience. Built using HTML, CSS, JavaScript, and hosted online . The site features smooth navigation, project galleries, and a downloadable resume section.
----------	---

Personal Traits	- Innovative Consistently brings fresh ideas and unique solutions to challenges, thinking outside of the box - Jovial Jovial and positive-minded, creating a friendly and engaging environment - Ambitious Ambitious with a strong drive to achieve goals and continuously grow
-----------------	---

Hobby	Singing
-------	---------

Certifications	Paper Presentation "Presented a paper on Smart waste management system using IoT for dustbin overflow detection and notification at Tech Fest 2025 at NEC, Kovilpatti showcasing research and innovative ideas among peers from various institutions." Introduction to IoT "Completed an online course on 'Introduction to IoT' from Simplilearn, gaining foundational knowledge in Internet of Things, its applications, and architecture." Placement Ready "Received 'Placement Ready' certification at NEC Tech Fest 2025, including training in resume building, interview skills, and job preparedness." Tech Talk "Participated in Tech Talk on 'VLSI Career Roadmap: Becoming Employable in the Semiconductor Industry' organized by Silicon Craft VLSI Training & Research Institute."
